Saliha Donmez / Cem Donmez
Cascade – Oil Package

The general problem of using large tin oils (5 - 10 kg) is the leaky oil collecting around the stopple and as a result of this tin becomes dirty. Besides of that there is a need of using extra oil bottle because of the weight of the package.

Cascade tin oil packaging designed as a response to these problems

Dimensions of the tin redesigned as: 22.5 cm * 15 cm * 60cm, 5lt capacity. If you want, you can use the tin as in traditional method or you can turn the package and attach to the tin stand. This tin stand can be promotionally distributed by oil firms (a simple shape). Later on when it gets popularity new designs can be produced by the sector. Tin stand works in faucet logic and helps us to open or close the cap of the tin.

When we want to take oil to our saucepan or frier put them under the tin stand and turn the handle which opens the cap of the tin and lets oil to flow.

In addition to its functionality it is an aesthetic object in your kitchen.

Gulbahar Coskun Package of Nut

The package of nut

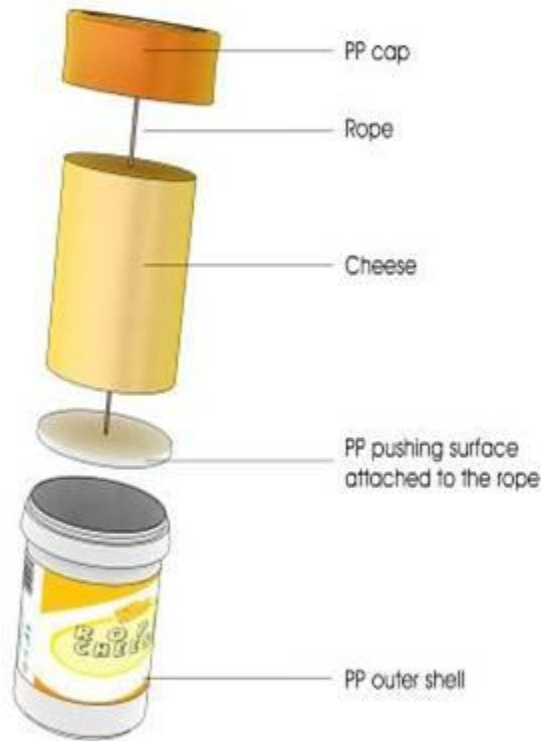

The package aims at preventing the nutshells to be thrown away and eliminating the other bowls needed during the serving. So the expected life of the package gets longer.

In its closed position it is a tetrahedron, when it is opened a second part which is designed for the nutshells appears. The package, whose volume enlarges when opened can stand by itself as well. It can be used for the service also.

PHILIPS Packing light bulb

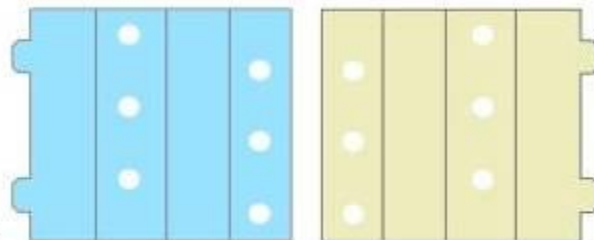

运输状态 的包装

产品在内部互相错落放置 牢固的
旋进每一个孔 使之互相绝不合
摩擦 这样在保证了运输的安全性
的同时
又很大的节省空间 降低运输成本

单个包装

双面平面展开图

材料: 运输面-牛皮纸 展示面-天兰色瓦楞纸

展示状态

的包装 可以放在柜台上做展示效果 只须把瓦楞纸翻转扣入便可
